Event Trading: Profiting from Economic Reports and Short...

Trade Economic Events — Economic events cause a lot of debate in the trading community. Due to their unpredictable nature and high impact trading, big announcements and events often cause extreme short-term volatility, which can result in big gains, as well as big losses. Some traders insist on never trading during major events, closing out their positions prior to releases and remaining inactive until the markets settle down.

Investing in Crisis: A High Risk-High Reward Strategy

Table 1: P/L " lock-in " when all trades are open. Basically, the rule for trading news events is this: If high volatility is expected, use the single down grid.Otherwise use the single up grid..The single down grid is a clear winner in highly volatile situations. This is because it reaches its maximum profit potential when the price crosses the grid at all levels and all trades are ...
